

Riviera modeldokumentation

Title	Double RSI trading
File/model	Udvikl/Riviera
Author	Peter Konner, www.pointfigure.dk
Date, version	September 2010, v1.00
Type	Longterm trading model, weekly basis
Indicators used	RSI
Help	F1 in the model window (danish only)
Issues!	-none-

Explanation

This model calculates two different length RSI's, and also two different moving averages.

Primary buy and sell signals are given from the "slow" combination of RSI and MA. If this combination is in downtrend, short term signals are given by the "quick" combination of RSI and MA.

Should only be applied on weekly charts.

For parameters and general setup see danish section below.

Beskrivelse

Modellen beregner to forskellige RSI, samt to forskellige MA'er på kursen.

Modellen giver primære købs- og salgssignaler ud fra RSI/MA-kombination "slow". Når denne kombination er i nedtrend, beregnes kortsigtede signaler efter den sekundære RSI/MA-kombination "quick".

Bør kun benyttes på ugechart .

Typiske værdier til opsætning af RSI og MA (ugechart):

<i>Alle tal i uger</i>	RSI	MA	MAtype	Buy level	Sell level
Slow	17	38	Simple	61	39
Quick	5	9	Simple	61	39

Parameteropsætning

Modelparametre	
Slow MA-type=Simple (blank=Exp)	<input checked="" type="checkbox"/>
Length, Slow MA	38
Length, Slow RSI	17
Buy level Slow RSI	61
Sell level Slow RSI	39
Quick MA-type=Simple (blank=Exp)	<input checked="" type="checkbox"/>
Length, Quick MA	9
Length, Quick RSI	5
Buy level Quick RSI	61
Sell level Quick RSI	39
